        h               ->      alias for help
```

2.1 Running

```
 sapera run

Here's an Algorithm of the Day
------------------------------
Name :Binary Tree Traversals
Algorithm Type: Traversals
Link to the Solution: https://github.com/TheAlgorithms/Python/blob/master/traversals/
↪binary_tree_traversals.py
```

2.2 Updating

```
 sapera update

Running Script...
.............................. Done
Already upto Date!
```

2.3 Run after update

```
 sapera update run

Running Script...
............................ Done
Already upto Date!
Here's an Algorithm of the Day
------------------------------
Name :Hamming Code
Algorithm Type: Hashes
Link to the Solution: https://github.com/TheAlgorithms/Python/blob/master/hashes/
↪hamming_code.py
```

CHAPTER 3

Contributing

Pull requests are welcome. For major changes, please open an issue first to discuss what you would like to change.
